OBJECTIVE

To secure a challenging position in a reputable organization to expand my learning, knowledge, and skills.
Computer Science Engineering

WORK EXPERIENCE

Application Engineer

Hexaview Technologies Private Limited

Dec 2020 - Current

Noida, U.P

- Optimize RESTful APIs that decrease the response time by 20%.
- Integrated Jasper reports to the existing project that generated PDFs depending on the template selected by the client.
- Created an Email Monitoring Tool that automatically replies to special emails based on the subject line.
- Responsible for maintaining three projects server (AWS), SSL, and backend-related enhancements.
- Migrated Client's Data times from "Redtail CRM" to "Salesforce CRM" using Talend Open Studios.
- Automated a new inventory host to fetch and save data to the existing system.
- Migrated all the client's data from the MySQL server to the S3 bucket.
- Received 5 Pat on the Back Awards.

PROJECT

Treasury

Tech Stack Tools: Java, AngularJS, Spring MVC, MySQL

Dec 2020 - Current

- This project is used to store the data and generate a detailed report.
- The user can add all their bills and expenses on the portal and get those verified by the leader(admin) for the authenticity of the bills.

Custom Reporting

Tech Stack Tools: Java, AngularJS, Spring MVC, Apache Cassandra, JasperReports, Talend Big Data

Dec 2020 - Current

- The project is used to digitize the report generation process.
- The users can upload import files that are used to generate the reports based on tiers (Monthly, Quarterly, and Semi Annual) and the report formats.
- The generated reports can be sent to the clients using the mail functionality provided by the portal.

Springboard Financial Service

Tech Stack Tools: Talend Open Studios, MySQL, Salesforce, Redtail

Oct 2021 - Dec 2021

- Migrated 4.5GB of client's data from Redtail to Salesforce Financial Cloud.
- Create Talend Jobs to migrate the data.
- The jobs are integrated with a JAR that automates the process of migrating data on different environments.

PG Management System

Tech Stack Tools: Java, Spring Boot, MySQL 8, ReactNative

June 2020 - July 2020

- PG Management system is used by Landlords to manage their inventories and tenant.
- Landlord can manually update and add the entries of tenants and inventories.
- The tenant uses the application to place food orders and view their existing orders and bills.

Virtual Police Station (VPS)

Oct 2019 - Nov 2019

Tech Stack Tools: Django, MySQL, ReactJS

- The VPS is used to digitally lodge a report.
- A user-friendly chat box is used to get all the details of the reporter.
- The user can view the status of their report and the logs of the reports are immutable.
